

The Four Sciences Climb

Science basics · ages 10–adult · 30 minutes · one screen, the free game, this page

For your homeschool table — a 30-minute lesson, zero prep. Open the free game on any screen and follow the five steps. Where a step says “the room/the group,” read it as your family; where it says “host,” that’s you.

1 · THE HOOK (3 min)

“Everything in this room is obeying laws right now — gravity, chemistry, biology, energy. Name one law being obeyed within arm’s reach.”

2 · PLAY TOGETHER (12 min)

Climb ten questions across the four sciences; keep a four-column tally (physics / chemistry / biology / earth) of where questions land — the room discovers its strong and weak science.

Play together: the group votes before anyone clicks, and every explanation is read aloud — the explanation is the lesson.

3 · THE TALK (8 min)

1. What makes science different from opinion — what’s the one thing a scientific claim must be able to do? (Be tested — and possibly fail.)
2. Which of the four sciences explains most of your daily life? Defend it.
3. What’s something “everyone knows” that you suspect is wrong?

4 · SOLO CLIMB (5 min)

Five questions in the group’s WEAKEST column.

5 · THE TAKEAWAY (2 min)

“Science isn’t a list of facts; it’s a way to catch yourself being wrong.”

Homework: Test one small claim this week — actually test it — and report the result, especially if you were wrong.

THE TEACHING CREED

You are not the expert; the game is. Your job is to vote last, read aloud well, and ask “why?” one more time than feels natural. Celebrate wrong answers loudly — in here, wrong is where the lesson lives.

GENO — the GSU tutor you can talk to, free, 24/7 in 32 languages — can explain any answer a second way.
