

The Trades Climb

Practical skills · teens–adult (pairs with the Steward's House) · 30 minutes · one screen, the free game, this page

For your homeschool table — a 30-minute lesson, zero prep. Open the free game on any screen and follow the five steps. Where a step says “the room/the group,” read it as your family; where it says “host,” that’s you.

1 · THE HOOK (3 min)

“What’s the most you’ve ever paid someone for a repair that turned out to be simple? No shame — everyone has one.” (Host confesses first.)

2 · PLAY TOGETHER (12 min)

Climb ten questions; every time a safety rule appears (breaker off, wire off the plug, water off first), the whole room repeats it aloud — safety rules are learned in chorus.

Play together: the group votes before anyone clicks, and every explanation is read aloud — the explanation is the lesson.

3 · THE TALK (8 min)

1. Why did schools stop teaching this — and who benefits from a generation that can’t fix anything?
2. Which repair on today’s climb will you actually attempt?
3. Where’s YOUR boundary — the job you’d never DIY — and why is knowing it a skill?

4 · SOLO CLIMB (5 min)

Five questions.

5 · THE TAKEAWAY (2 min)

“Diagnose before paying; maintain before breaking; respect the boundary.”

Homework: Perform one preventive check from today’s questions — tire pressure, GFCI test button, water-heater glance — and report.

THE TEACHING CREED

You are not the expert; the game is. Your job is to vote last, read aloud well, and ask “why?” one more time than feels natural. Celebrate wrong answers loudly — in here, wrong is where the lesson lives.

GENO — the GSU tutor you can talk to, free, 24/7 in 32 languages — can explain any answer a second way.
